OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
coho salmon	1993		X	X	<input checked="" type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

**IMPORTANT:** Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:** I examined a portion of this stream, designated Blueberry Creek, during a Forest Practices Inspection in 1993 to determine extent of anadromous fish habitat under the FRPA, and documented coho salmon juveniles above the mainline road. The upper extent of fish habitat shown in the Atlas may be too far south, based on high gradient. See attached maps for upper extent of Type A habitat (less than or equal to 8% gradient) during the harvest period in the mid 1990s. Add local name to catalog.

Name of Observer (please print):

James D. Durst, Habitat Biologist

Signature:

James D. Durst

Re: Klawock Heenya Heli., SE-90-001

Dear Mr. Kato:

Enclosed you will find a Forest Practices inspection report dated April 20, 1993. This report covers Klawock Heenya's operation at Klawock Heenya's helicopter operations.

Please sign the enclosed report and return the original white copies to me. If you have questions concerning the report or other forest practices issues, call or drop by.

Sincerely,

Al Peterson  
Forest Practices Forester
